You Mold It. We Release It.™

B231 Rocket Release™

Food Grade Release Agent

Product Description

Stoner® B231 Rocket Release™ is an extremely versatile release agent which is generally acceptable for applications where a food grade release is required. In many applications, Rocket Release is considered to be the “most paintable” release agent available when molding plastics and similar materials. Rocket Release allows molded parts to be painted, plated, hotstamped, adhesive bonded, labelled, or otherwise decorated in most applications. Provides a long lasting anti-stick film for fast, easy part removal from molds and multiple part releases per application. Improves molding efficiency in many processes including injection, vacuum form, and pour cast molding. Economical – a light coating produces best results.

Stoner® B231 Rocket Release™ ADVANTAGES:

- Allows molded parts to be painted, hotstamped, or otherwise decorated.
- The release agent in E302 meets FDA regulation
- 21 CFR 184.1400 as a release agent in the manufacture of food contacting materials.
- Improves part appearance and reduces defects caused by sticking.

- Formulated to provide high levels of user and environmental safety.
- Contains no chlorinated solvents such as 1,1,1 trichloroethane, trichloroethylene, or methylene chloride.
- Colorless and non-staining.

Uses

Stoner® B231 Rocket Release™ is an extremely versatile release agent for molding:

- Food grade
- Paintable.

Directions for Use

Recommended Procedure

Apply as needed to loosen and flush away contaminants. Difficult areas may require second application or scrubbing with brush or rag. Allow excess to air dry or dry with rag. XENIT is a strong cleaner which may be harmful to certain plastics, paints, or other sensitive materials. Always test in a small area before using.

Storage and Handling

Do not use near ignition sources. Do not expose container to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death. Use with adequate ventilation. Avoid prolonged or repeated breathing of vapor or contact with skin. Do not store containers in excessive heat or direct sunlight. Store in a cool, dry, well ventilated area away from all sources of ignition. Do not store at temperatures above 122° F. Store at temperatures between 45° and 99° F. Normal precautions common to safe manufacturing practice should be followed in handling and storage.

Packaging

93123 XENIT™ Citrus Mold Cleaner is available in:

- 5-gallon pails & 55-gallon drum Part # B231
- 12 can case of 12 oz cans Part # E302
- 37 pound Giant Aerosol Part # E702
