

Honey Edge Wax

General Purpose Mold Release Agent

Product Description

Honey Edge Wax is an economical, general purpose mold release agent designed for tooling surfaces not requiring a class A surface. **Honey Edge Wax** is typically used on the flange areas of molds, the edges of molds, on polymer concrete molds, or on cast polymer hat molds. **Honey Edge Wax** can also be used on mold bracing, or as a table or floor coating to assist in preventing spilled resins or gel coat overspray from adhering.

Directions for Use

Recommended Procedure

1. The mold surface should be thoroughly cleaned of all contaminants such as oils, grease, or dirt with **KantStik® Mold Cleaner**. The cleaned surface should be completely dry.
2. Using a clean, dry rag, apply a layer of **Honey Edge Wax** on the flange or edge.
3. When used as a flange, edge, or hat mold, it is not necessary to remove or buff the wax off the mold surface.
4. Once a part is pulled, apply **Honey Edge Wax** as required.

Storage and Handling

This product contains flammable solvents. Reseal the lid after each use. Store in a cool, dry place. Use in a well-ventilated area. Consult SDS prior to use. Shelf life is 12 months from date of manufacture.

Packaging

Honey Edge Wax is available in:

- Cases of 4x1-gallon Part # P50901GLXXX2
- 5-gallon pails Part # P50905PLXXX2
- 55-gallon drum Part # P50955DRXXX2
